## AGE

01 October 1987 (29 years)

## OBJECTIVE

Seeking a position as a Full Stack Developer, Web Developer, Frontend Developer.  
Happy to immigrate to the Netherlands.

## WORK EXPERIENCE

### Freelancer.com

**Nov 2014 — Present**

Freelancer

There you could find more than 100 references about my real projects  
<https://www.freelancer.com/u/bronskiy.html>

After the Russian economy crisis I've decide to work on projects from all over the world because of dollar to ruble exchange rate. Also I got more experience in web development, tested new technologies, improved English language skills and got loyal clients from US, Canada, Australia and Europe.

### Iconic Line LLC, New York

**Dec 2013 — Present**

Co-Founder

This company has been created to sell my web development services.

### Solvelight Robotics LLC, New York

**Dec 2013 — Present**

Co-Founder

I've created solvelight.com e-commerce website from scratch. It was build with ExpressionEngine 2 CMS that based on Codeigniter framework. The website has been integrated with custom CRM system and warehouse system, Mailchimp newsletter, preferred US payment systems etc.

### MIAP LLC, Moscow

**Jan 2011 — Nov 2014**

Senior Developer

MIAP is an ordinary non-IT company in Moscow. I've started to work there to get some experience when I still was studying on 4th course in the University. I was creating websites for this company, creating branding, managing exhibitions, ordering PC components to build PCs from it and install necessary software on it, managing internal and external servers(based on Windows and Linux) and network, even installing secure cams in the company's office and warehouse.

Mostly I was web-developer there.

I'm still managing their websites and SEO.

You could ask them about my experience. They even have a couple of english speaking employees.
